

Tank-mix sheet

Please note that physical compatibilities may not be approved tank-mixes. The tests do not check for any adverse crop phytotoxicity or for the biological efficacy of the individual components when applied in a tank-mix. Bayer Crop Science gives no warranty and accepts no liability in respect of physical compatibilities; therefore, use is at grower's own risk.

All the requirements or restrictions on other product labels must be adhered to when tank-mixing with Alternator Met®. Contact Bayer Crop Science for full details.

Alternator Met can be tank-mixed alone and in 2-3 way herbicide mixes specified below with the insecticides specified below.

Always maintain continuous agitation of the sprayer tank during mixing, transportation and application.

Herbicides – up to 1.0L/ha Alternator Met		
Avadex Factor	Pendimethalin (up to 1200 g a.s./ha)	Tower
Defy (up to 3.0L/ha Defy winter wheat only and pre-em only)	Picolinafen + flufenacet co formulations (up to a total of 240 g flufenacet)	Roundup® Biactive GL * ~
