

Tank-mix Sheet

Oilseed rape

Revised November 2016

Please note that physical compatibilities may not be approved tank-mixes. The tests do not check for any adverse crop phytotoxicity or for the biological efficacy of the individual components when applied in a tank-mix. Bayer Crop Science gives no warranty and accepts no liability in respect of physical compatibilities; therefore, use is at grower's own risk.

All the requirements or restrictions on other product labels must be adhered to when tank-mixing with Kestrel®. Contact Bayer Crop Science for full details.

Bayer Crop Science will support the tank-mixing of Kestrel with any of the herbicides in the first table as well as with an insecticide from table a. A maximum of only two selections, one from the list of herbicides and one from the list of insecticides (table a) may be mixed at any one time e.g.

Kestrel + Aramo + cypermethrin OR Kestrel + Aramo + decis etc.

Kestrel can be tank-mixed with an insecticide from table b but will be supported as a two-way tank-mix only e.g.

Kestrel + Plenum
