

Tank-mix sheet

Maize

Please note that physical compatibilities may not be approved tank-mixes. The tests do not check for any adverse crop phytotoxicity or for the biological efficacy of the individual components when applied in a tank-mix. Bayer CropScience gives no warranty and accepts no liability in respect of physical compatibilities; therefore, use is at grower's own risk.

All the requirements or restrictions on other product labels must be adhered to when tank-mixing with Maister WG. Contact Bayer CropScience for full details.

Bayer CropScience will support the tank-mixing of Maister WG + Mero with one of the herbicides in the first table or with one of the micronutrients in the second table. A maximum of one selection may be mixed at any one time e.g. Maister WG + Mero + Callisto etc **or** Maister WG + Mero + Headland MaizeMicro etc.

Herbicides		
Callisto (Max rate 0.75 L/ha)	Oceal 0.25 kg/ha	

The following herbicide has been found to be physically incompatible with Maister WG and Mero;

Butryflow

Recent Changes	
6/2/15	Dow Shield 400 and Starane 2 tank-mixes removed
1/2/16	Caution added to advise against tank-mixing with chlorpyrifos or sequencing within 28 days
28.09.20	Nortrace Mens, YaraVita Phosamco, Buctril removed
09.06.21	Stomp aqua removed (also removed Calaris and Templar from incompatible statement)
